

Content Evaluation: Round 2 Blind A/B Comparison

Generated: 2026-02-23

SKUs evaluated: 10

Round: 2 (post Plan 25-04 gap closure)

Categories covered: Paper Towel Holders, Towel Rings, Cabinet Hardware, Multi Hooks, Toilet Paper Holders, Robe Hooks, Make-Up Mirrors, Glass Shelves, Shower Curtain Brackets, Retractable Hooks

Pre-Evaluation Sanity Check

Gap 1 (Finish in titles): All 10 new titles now include `{FINISH_NAME}` placeholder. When rendered for a specific variant, the finish name will appear in the title. This is a structural improvement.

Gap 2 (Product-specific differentiation): New descriptions show more product-specific framing in some cases (1098 calls brackets "a part of the bath most brackets treat as an afterthought", CL-22 highlights the removable knob tip). Some descriptions still lean on generic competitive positioning.

Gap 4 (Factual accuracy): SKU 1024 still contains "Skip the spring-loaded roller" which was flagged in Round 1. Note this for evaluation.

Gap 5 (28 finishes on variants): Several master SKU descriptions still mention "28 finishes" (102, 1024, WP-2/16-GAL, 1098). These are master-level regenerations without `finish_code` context.

Instructions for Evaluator

For each SKU below, two titles and two descriptions are shown as "A" and "B" (randomly assigned -- one is old, one is new). For each:

1. **Title winner:** Which title is better? (A or B)
2. **Description winner:** Which description is better? (A or B)
3. **Differentiation test:** Could you identify this product as Allied Brass (not a generic hardware store) from the winning description? (Yes/No)
4. **Brief note:** What makes the winner better? (1-2 sentences)

DO NOT look at the Answer Key at the bottom until all 10 SKUs are scored.
