

Pilot SKU Selection Detailed Rationale (Ads 30d + GA4 30/90d)

Scope

- Goal: select 40 MasterSKUs for a low-risk, learnable optimization pilot.
- Optimization unit: MasterSKU aggregated from variant item_ids.
- Selected list: `data/pilot_sku_selection/selected_master_skus.txt` (40 MasterSKUs).
- Control group: `data/pilot_sku_selection/control_master_skus.txt` (16 MasterSKUs).

Data sources and mappings

- Google Ads (MCP) 30d Shopping performance by `segments.product_item_id` :
 - `data/pilot_sku_selection/ads_30d_top_impressions.jsonl`
 - `data/pilot_sku_selection/ads_30d_top_clicks.jsonl`
 - `data/pilot_sku_selection/ads_30d_top_conv_value.jsonl`
- GA4 (MCP) item performance from Shopify property:
 - `data/pilot_sku_selection/ga4_30d.jsonl`
 - `data/pilot_sku_selection/ga4_90d.jsonl`
 - Source/medium filter removed due to GA4 compatibility; values reflect all traffic.
- Catalog mapping for aggregation and metadata:
 - `data/pilot_sku_selection/candidate_items.csv` (item_id -> MasterSKU + category/collection)
- Tier labels and baseline summary:
 - `dashboard_data/lifestyle-eval-candidate/reports/pilot-selection-report.md`

Applied selection logic (as executed)

- Traffic filter relaxed to impressions ≥ 0 and clicks ≥ 0 due to account size.
- Excluded top-5 by GA4 90d revenue to limit revenue risk:
 - CL-55, FR-23, TD-23, CL-28-30, CL-54
- Tiering strategy used for balance:
 - Tier1: high conversion efficiency, low count (risk-managed winners).
 - Tier2: mid-pack performance, primary test bed.

- Tier3: high traffic with low efficiency (largest upside).
- Fill: used to reach 40 SKUs while maintaining category coverage.
- Diversity summary (selected set):
 - 24 categories represented (largest: Glass Shelves = 7, Towel Bars = 4).
 - Additional notable categories: Assorted Free Standing Accessories (3), Freestanding Toilet Tissue Stands (3).

Calculation notes

- $\text{Cost} = \text{metrics.cost_micros} / 1,000,000$
- $\text{CTR} = \text{clicks} / \text{impressions}$
- $\text{CVR} = \text{conversions} / \text{clicks}$
- $\text{ROAS} = \text{conversion_value} / \text{cost}$
- $\text{CPC} = \text{cost} / \text{clicks}$
- $\text{CPA} = \text{cost} / \text{conversions}$
- Percentile ranks computed within the selected 40-SKU set for: impressions, clicks, CVR, ROAS, conversion value.

SKU-level rationale

SKU: 920D-6

- Tier: Tier1
- Category: Multi Hooks
- Collection: Mercury
- Variant item_ids used (1): shopify_us_4538762494084_32096757710980

Ads 30d (Google Shopping):

- Impressions: 2
- Clicks: 1
- CTR: 50.00%
- Cost: \$0.40
- CPC: \$0.40
- Conversions: 2.00
- CVR: 200.00%
- Conversion value: \$1,270.00
- Conversion value per click: \$1,270.00

- Conversion value per impression: \$635.00
- ROAS: 3175.00

GA4 (Shopify):

- 30d items purchased: 0
- 30d item revenue: \$0.00
- 90d items purchased: 0
- 90d item revenue: \$0.00

Relative position among selected SKUs (percentile):

- Impressions percentile: 5.0%
- Clicks percentile: 12.5%
- CVR percentile: 100.0%
- ROAS percentile: 100.0%
- Conversion value percentile: 92.5%

Selection rationale:

- Traffic band is low (impressions/clicks percentiles: 5.0% / 12.5%).
- Efficiency band is high (CVR/ROAS percentiles: 100.0% / 100.0%).
- Tier1 selection prioritizes high efficiency with limited risk exposure; this SKU fits the high-efficiency profile without being in the top GA4 revenue exclusions.
- GA4 shows no revenue in the last 90 days in this extract, reducing revenue-risk exposure while still enabling learning from Ads traffic.
- Provides category coverage and collection coverage in the final 40-SKU mix.

SKU: CL-41-30

- Tier: Tier1
- Category: Towel Bars
- Collection: Carolina
- Variant item_ids used (1): shopify_us_4542499979396_32116325384324

Ads 30d (Google Shopping):

- Impressions: 74
- Clicks: 1
- CTR: 1.35%
- Cost: \$4.14

- CPC: \$4.14
- Conversions: 1.00
- CVR: 100.00%
- Conversion value: \$357.00
- Conversion value per click: \$357.00
- Conversion value per impression: \$4.82
- ROAS: 86.23

GA4 (Shopify):

- 30d items purchased: 0
- 30d item revenue: \$0.00
- 90d items purchased: 0
- 90d item revenue: \$0.00

Relative position among selected SKUs (percentile):

- Impressions percentile: 12.5%
- Clicks percentile: 12.5%
- CVR percentile: 97.5%
- ROAS percentile: 92.5%
- Conversion value percentile: 40.0%

Selection rationale:

- Traffic band is low (impressions/clicks percentiles: 12.5% / 12.5%).
- Efficiency band is high (CVR/ROAS percentiles: 97.5% / 92.5%).
- Tier1 selection prioritizes high efficiency with limited risk exposure; this SKU fits the high-efficiency profile without being in the top GA4 revenue exclusions.
- GA4 shows no revenue in the last 90 days in this extract, reducing revenue-risk exposure while still enabling learning from Ads traffic.
- Provides category representation and collection representation in the final 40-SKU mix.

SKU: P-550-WPT

- Tier: Tier1
- Category: Paper Towel Holders
- Collection: Pipeline
- Variant item_ids used (1): shopify_us_4545081081988_43093829714146

Ads 30d (Google Shopping):

- Impressions: 48
- Clicks: 1
- CTR: 2.08%
- Cost: \$3.83
- CPC: \$3.83
- Conversions: 1.00
- CVR: 100.00%
- Conversion value: \$404.25
- Conversion value per click: \$404.25
- Conversion value per impression: \$8.42
- ROAS: 105.55

GA4 (Shopify):

- 30d items purchased: 0
- 30d item revenue: \$0.00
- 90d items purchased: 12
- 90d item revenue: \$970.20

Relative position among selected SKUs (percentile):

- Impressions percentile: 10.0%
- Clicks percentile: 12.5%
- CVR percentile: 97.5%
- ROAS percentile: 95.0%
- Conversion value percentile: 47.5%

Selection rationale:

- Traffic band is low (impressions/clicks percentiles: 10.0% / 12.5%).
- Efficiency band is high (CVR/ROAS percentiles: 97.5% / 95.0%).
- Tier1 selection prioritizes high efficiency with limited risk exposure; this SKU fits the high-efficiency profile without being in the top GA4 revenue exclusions.
- GA4 shows purchase/revenue signal in the last 90 days, indicating real demand beyond Ads alone.
- Provides category coverage and collection representation in the final 40-SKU mix.
